

Successful Landing Wed. at Coleman's New Field

Big Crowd Welcomed Airplane Yesterday

First Machine to Land on New Field Piloted by Flying Officer Jenkins—Crowd Enjoyed a Few Thrills

Flying Officer Jenkins, R.C.A.F. of High River forestry patrol, at 2:30 p.m. yesterday made a graceful landing of the fast plane to alight at Coleman, on the new field two miles west of town. He flew a De Havilland Moth two seater. His arrival was greeted by members of the Board of Trade and a large number of people from Coleman, Blainmore and Bellevue besides the children from Central and West Coleman schools, which were closed early to give the children an opportunity of seeing a plane at close quarters. The children were equal to the occasion and were equally thrilled with seeing the "birdman," and pressed on him from all sides, while others were craning their necks to get a glimpse into the cockpit of the machine.

After making his first landing at the east end of the field, and taxiing down the 1500 feet stretch to the wind indicator, he expressed his satisfaction of the condition of the field, and made some suggestions regarding a slight depression which will require levelling. He then took off and gave the crowd a few thrills in a tail spin, a couple of rolls and a few loops, which were executed perfectly. Coming to earth again, he showed how the wings of the plane are folded back, the plane resembling a huge fly minus outspread wings.

Cameras on all sides were clicking views of the machine and the aviator, and many were wishing they could have taken a trip aloft. After about an hour's stay, the machine took off for Pincher Creek, Forest Supervisor Alexander going back as a passenger.

Mr. Jenkins stated that he found the field in good shape, with the exception of a depression about half way. The machine appeared to taxi evenly over the ground in the take-off, and he stated there was plenty of room for even larger planes than the machine he was using.

It is likely a further inspection will be made by Air Board officials so that in the event of it being decided on as a permanent landing field for the commercial and air mail route, the necessary accommodation may be made for planes desiring to land here.

The children had the greatest thrill yesterday when the airplane made a tail-spin. And the aviator was a hero to most of them. He excited as much admiration in their eyes as the machine.

No Fish Story—He Has The Goods

The largest pumpkin seen in Coleman was that brought in last week by Frank Celli from Gus Velenau's farm at Creston, B.C. It took the first prize at Creston fall fair, and weighed 77 lbs. There was one exhibited which went over a hundred pounds, but was not as good quality as the one on exhibition in the Palm Cafe window. Take a look at it and you'll agree that it is "some pumpkin."

J. R. Hill arrived last week from Medicine Hat to take the place of J. Stephenson as ledger keeper, the latter having been transferred to the Bank of Commerce branch (North end) Lethbridge.

Cultivate Good-Will Through Advertising

The local retailer who cultivates the good-will of the public by advertising weekly in his local paper is using the best medium he can employ for promoting more friendly relations and increased business. Without question the public respond to advertising, and they become interested in the store which has a weekly message for them. A merchant who follows this plan, keeps his store and stock attractive, and in so doing, has no reason to fear chain store competition.

Advertise In Your Local Newspaper

Board of Trade Notes

P. M. Christopher, M.L.A., interviewed by O. E. S. Whitehead, chairman of the Parks committee, and L. I. Morgan, president of Blainmore Board of Trade, and also by H. T. Halliwell, president of Coleman board, stated he would give his support and influence to the establishment of a provincial park at Crow's Nest Lake, when the matter of appropriations for this purpose comes before the legislature. The commission appointed by the government has decided to spend \$17,000 on resorts at Gull Lake and Sylvan Lake.

All business men and others interested in Board of Trade activities are requested to hand in their membership fee for 1929 to Secretary Rippon at the bank. The board needs funds to carry on its activities and the low fee of \$2.00 is asked for.

The executive of the Board extends its thanks to the International and McGillivray companies for loaning trucks and drivers to help in clearing the emergency landing field, to Forest Ranger Boulton for supervising the work, and to those who contributed towards the expense. Also to George Pattinson for loan of truck.

Every business man should make it a point to attend the luncheon meetings. He should also advise the secretary so that proper arrangements can be made at the hotel. A very nice luncheon was served at the last meeting in the Grand Union, but of forty to whom notices were sent, only a dozen responded. Those present took an active part in discussions and keen interest in the board's activities. The Board's work is in the interest of the town as a whole, and business men rightfully must be the leaders in community work.

Tennis Club Dance

Posters are being sent out for a dance to be held in the K. of P. hall on Tuesday next at 9 p.m. Salt's 4-piece orchestra will furnish the music.

The time may come when battleships, like convict ships, may be objects of public curiosity.

A Hotel in Diamonds

Like a story from the Arabian Nights is the description of the miniature model of the Royal York Hotel, shown at the Toronto Exhibition this fall. The model is valued at over \$300,000 and in its construction there were utilized more than 15,000 Ellis faultless quality diamonds. They were mounted on a framework composed of satin wood covered with the finest wax. The miniature was drawn true to scale and measured 15 inches high by 12 inches broad. Reflected from thousands of facets, the brilliant display of light, broken into all the colors of the spectrum, made this exhibit one of the most visited and most talked-of at the big Fall Fair.

Miners Union Executives Send Delegation to Capital

Federal and Provincial Representatives and President of Union Discuss Problem of Seasonal Employment in Crow's Nest Coal Mines

The executive committee of the local unions of the miners of the towns of Coleman, Blainmore and Bellevue met on Thursday evening last at Blainmore to arrange for a delegation to meet Premier Brownlee and discuss the unemployment conditions caused by seasonal occupation in the mines, which affects a large number of men in the steam coal area of the Crow's Nest Pass.

There were present on invitation of the miners' executive, G. G. Coote, M.P., and P. M. Christopher, M.L.A. The meeting was presided over by Frank Wheatley, president of the Mine Workers Union of Canada, and Dave Gillespie of Coleman was secretary.

W. Lees of Coleman, stated that though the tonnage shipped was greater this year than for several previous years, yet the period of employment for resident miners was less. It was creating a hardship for the men with families, who could not pay their way.

Mr. Wheatley reported that a partial survey had been made among retailers to find how much credit was being given, and figures for Coleman alone showed nearly \$80,000 carried among grocers and butchers, while in other lines quite a large amount of credit accounts are carried. If retailers were to eliminate credit entirely, then many people would have to go without even the necessities. A letter was read from a Blainmore retailer showing that the credit accounts were not being reduced, and it could easily be seen that with 200 or less working days in a year sufficient could not be earned to catch up with back debts.

Mr. Coote stated that the reason he was present was by invitation of the miners executive. From his

short observance of conditions, he could see there was a difficult problem to solve. The railways were apparently satisfied with the present method of shipping coal, and he had discussed the matter on three occasions with the Federal minister of labor, Hon. Peter Heenan. As a move towards smoothing out the difficulties or alleviating conditions, he suggested a meeting with the provincial government executive, to see if it would be in the interests of all concerned to take the matter up with the railway companies. He could quite understand the reticence of the mine operators to move in the matter, for they did not wish to take any action which would jeopardize or prejudice existing business.

P. M. Christopher stated that an investigation had been ordered by the provincial government as to unemployment in the Pass towns, but in spite of relief which might be granted, it would not solve this annual problem, and as far as he could see it would possibly mean that a re-organization of the whole industry would become necessary to protect the interests of both labor and capital. The increasing use of fuel other than coal were making it increasingly difficult for the mining industry. He would use his influence in helping to solve the problem.

Following a general discussion by the delegates, a motion was passed that President Wheatley, G. G. Coote and P. M. Christopher interview Premier Brownlee and a further motion was passed that a sub-committee of the miners union be nominated for taking part in a conference, if it was decided on, following the interview of the three gentlemen with the premier. The committee appointed were Mr. Brooks, Bellevue; D. Gillespie, W. Lees, Coleman, and Mr. Peters, Blainmore.

International Team Won First in Mine Rescue Competition

Scored 93.7 of Possible 100—First Aid Team Awarded Second Place With 1092 of Possible 1200—McGillivray Trophy for First Place Won by Canmore First Aid Team

Grand Smoker in Evening and Presentation of Prizes

Mining Companies' Executives Express Appreciation of Unselfish Spirit of Competitors and Take Part in Presentation of Prizes

Mine rescue and first aid competitions held on Saturday at Blainmore, resulted in Canmore winning first place in First Aid with 1108 points of a possible 1200; International team, Coleman, second, 1062 points, and Blainmore team third, with 1054. In mine rescue competitions International was first with 93.7 per cent; Blainmore 92 and Hillcrest 91.4 per cent. Teams competing in First Aid were: Canmore, Hillcrest, Bellevue, Greenhill (Blainmore), Muniz mine, International, McGillivray, Coleman town team. In mine rescue work the competing teams were: Canmore, Bellevue, Greenhill, McGillivray and International.

Provincial officials of the mines branch of Alberta, and of the B.C. mines branch, officiated as judges, and local arrangements were capably handled by Moses Johnson, district inspector of mines. The presentation of prizes was made by A. Ross, chairman of the Compensation Board, and O. E. S. Whitehead, general manager of International Coal and Coke Company, Limited.

Smoker Staged

The day concluded with a smoker at the Greenhill Grill, Blainmore, at which addresses were given by G. Kellock, vice president of McGillivray Company; O. E. S. Whitehead, J. McDonald, mines inspector of Fernie; P. M. Christopher, M.L.A., and A. Ross. Guests from other points present were: Gordon MacLean, of the Mine Safety Appliance Company, Pittsburgh, and C. K. McLeod, of Eufield, McLeod, Limited, Montreal.

Prize Accorded Teams

G. Kellock, on behalf of the mine operators, expressed appreciation of the interest taken by the competitors. Unintended credit was due

to the teams, no matter if they won prizes or not. The greatest reward was not in winning a prize, but in being able to do something for their fellow men when the occasion required. When disaster or a major accident occurred in the mines, it gave pride and satisfaction to see the mine rescue teams going into action. It was work which was not done in the full glare of publicity, and no flaring headlines perhaps would record the deeds of heroism that might be performed, but none the less the men went into unknown dangers, for no individual could forecast what might be encountered in the extensive workings below ground.

Incident Recalled

In regard to first aid, he recalled an incident of 25 years ago. A man was injured very seriously in a cutting machine. He saw him dragged in, and later he died. Yet, the first aid had been administered, the man would in all probability be alive today. Men who knew first aid work were of equal service as a doctor in an emergency below ground, and he hoped the Compensation Board would encourage to the full the work of first aid and mine rescue work.

Mr. Whitehead, general manager of International Co., stated it was a source of pride to see that men would give of their free time to become proficient in the work of rendering aid in times of disaster or accident. He had noticed the progress made over 17 years, and reached the expression of appreciation and admiration for the voluntary service given by mine employees in facing danger and death to help their comrades.

Canadian Anomalies

Following the close of the Great War by the signing of the Armistice, Canada demanded and was accorded a place of equality with other nations of the world at the Peace Conference, and, with the creation of the League of Nations, Canada entered that League on exactly the same terms as all other nations. That is to say, Canada was recognized as a nation. And in signing the League Covenant, Canada accepted the responsibilities of a nation.

At the last Imperial Conference, in London, with all the self-governing Dominions of the Empire and the British Government fully represented, a formal declaration was adopted setting forth that Canada and the other self-governing Dominions were fully autonomous nations within the British Commonwealth of Nations, possessing exact equality with Great Britain.

As a logical outcome of these declarations, Canada has established her own legations in certain foreign countries, appointed her own ministers, and, in turn, these countries have named ministers at Ottawa. Thus, as a nation, Canada has direct representation at Washington, Paris and Tokio, in exactly the same manner as any other country. Equally significant is the fact that the British Government has appointed a High Commissioner to Canada, while Canada maintains a High Commissioner in London.

But while Canada is thus recognized as a nation, it is the only nation in the whole world which has no nationality of its own, and no distinctive flag of its own. These are anomalies which other people find it extremely difficult to understand.

In England, people born in that country are recognized and officially listed as English, if born in Scotland, they are listed as Scottish; in Ireland, as Irish; in France, as French; in Germany, as German; in the United States, as American. Born in Canada, on the other hand, a person may be listed as of any nationality under the sun except Canadian. Officially, there is no such person as a Canadian.

The writer of this article was born in Canada as were his father and mother. His mother's parents were both born in Canada. His father's parents were born in Ireland, their ancestors having crossed to the Emerald Isle from Scotland. So the writer becomes, in Canada, an Irishman although neither he nor his parents ever saw Ireland. If his grandfather had been born in Siam, then the writer would be a Siamese.

In the face of such an anomaly, such a ghastly absurdity, it is little wonder that the people of other countries laugh in the face of any person born in Canada who is bold enough to lay claim to his country being a nation.

Every nation in the world, except one, has a distinctive flag of its own. The exception is Canada. Australia, New Zealand, South Africa, Newfoundland, the Irish Free State all have their distinctive national flags, as well as the Union Jack, the flag of all of Great Britain and the Empire. Canada has a distinctive flag for its merchant marine, and by Order-in-Council it has been decreed that this shipping flag shall be flown over Canadian Government buildings in the British Isles, and in foreign lands, but it is not officially recognized anywhere else.

Thus, while a Canadian may fly a distinctive Canadian flag over a ship owned by him, he may not fly it over his office building or his residence, and while such a flag may be flown over a Canadian Government building in London, Washington, Paris, or Tokio, it cannot be flown over a Canadian Government building in Halifax or Vancouver, or anywhere between these two points.

A person born in Canada is, therefore, that peculiar individual among the peoples of the world who has no nationality he can call his own, and no distinctive flag that he can properly fly in his own land and over his own home and public institutions.

And yet the people of Canada find pride in calling Canada a nation. Why, this so-called nation of Canada has not even the right to amend its own constitution, a power possessed by other self-governing dominions of the British Commonwealth.

Canada is, and is proud to be, and desires to remain, a part of the British Commonwealth of Nations. It is proud of and loyal to the Union Jack as the flag of that great Commonwealth, and will ever retain it. But just as the Dominion has its own Coat of Arms, and each Province its Arms, and each city its Arms, so do the people of Canada desire to establish and retain their own nationality, have their own distinctive flag, and enjoy full autonomy in their domestic affairs.

Much as a native born Canadian may love England, or Scotland, or Australia, or New Zealand, he does not desire to merge his identity or lose his individuality. He is a Canadian and desires to be known as such, not as an Englishman, a Scotsman, an Australian or a New Zealander.

If Canada is a nation, let it display the qualities and the insignia of a nation.

Student Aviator Gets Thrill

Fell Out Of 'Plane But Fortunately
Had Parachute

Arthur Carter, automobile dealer and student aviator, of Springfield, Mass., experienced an unexpected thrill when he fell out of his 'plane while flying 1,600 feet over Springfield airport.

Center, who was flying without a safety belt, but who had a parachute, pulled the cord of his parachute and made a landing unhurt. The 'plane fell in an open field and was demolished.

Reconstructing a Liner

Timber From Many Countries Used
On Palatial Steamer

Timber of many forests in many countries has been used for reconstruction and redecoration during the seven weeks' overhaul of the White Star liner "Majestic," which recently left Southampton for New York, on her one hundredth west-bound crossing. The varieties of wood included oak, mahogany, teak, beech, ash, satinwood, walnut, Oregon yellow and pitch pine, deal. Forty-four tons of paint was used on interior and exterior work, whilst 18,000 yards of electric wire was used in wiring electric bells and electric lights in cabins of tourist third cabin accommodation.

Women Are Excluded

By the ironclad rule of a woman, no woman has ever entered the gigantic Krupp plant except the former kaiserin. The regulation was laid down by Frau Margarethe Krupp, for years chief director, and continued in force by her daughter, the present owner, Frau Bertha Krupp von Bodeln and Halbach.

Five hundred years before the birth of Christ, Hippocrates, a Greek, wrote a book on medical science which is still studied by students in America and Europe.

All Weather Road Promised

From International Boundary To
Prince Albert National Park

An all-weather highway from Regina or the boundary to Prince Albert National Park will probably be put into condition, F. R. MacMillan, of Saskatoon, president of the Saskatchewan Conservative Association, told members of the Kiwanis Club at Prince Albert. He thought that this should be the policy of the government, and the fact that a cabinet minister in the Anderson Government, Hon. J. A. Merkle, was an ardent supporter of the project, was evidence of the government's interest.

HEALTH REGAINED

Mother and Daughters Restored
Through the Use of Dr.

Williams' Pink Pills

"Contrary to what my friends once thought, I am still living," says Mrs. Norman White, New Canada, N.S., "and I give the credit to Dr. Williams' Pink Pills. I had been a sufferer for some years. I was weak and run-down; my heart would palpitate violently at the least exertion. I grew so weak that I could not do my housework. I was under a doctor's care, but it did not benefit me. A second doctor was called in, but with no better results. I was told that I was almost bloodless, and I became so weak I was forced to remain in bed. My friends did not believe I could recover. While in this condition a neighbor strongly urged me to try Dr. Williams' Pink Pills. It was like grasping at a straw, but six boxes of this medicine were got for me, and by the time I had taken them I was able to sit up. Another six boxes were got and soon I was able to go about my usual duties. I continued the use of the pills until I felt my health fully restored. I still take the pills occasionally as a safeguard. My two daughters have also used the pills with most beneficial results. I have trouble in both cases was the anemia that so often comes when girls are young women. I have used this medicine both fully regained health, strength and activity. You can see, therefore, that it is impossible for me to praise Dr. Williams' Pink Pills too highly, and I hope every weak person who may read this will benefit by my experience."

You can get these pills from any medicine dealer or mail order at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Escape From Submarine

Men Leave Submerged Craft In
Record Time During Experiment

Ten men emerged from the sunken submarine T-17 in forty-eight seconds during a submarine experiment in Italy, making what is called a world record for such a feat.

Half of the participants used head pieces, while the others were not especially equipped. The submarine carried a new device consisting of a large bowl beneath a torpedo, permitting the men to leave the submarine without water entering the hull.

A Household Meddler.—They that are acquainted with the properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and it is effective in dealing with many ordinary complaints. It is an inexpensive medicine. So, keep it handy, as the call for it may come most unexpectedly.

What's In A Name?

An Englishman's home is his castle, but whether he is able to call his castle what he likes is a matter of some doubt. The thought arises because the Bank of England officers have decreed that the words "Bank of England" on a building in Bunbury must be removed. The words, carved in bold letters in stone, have adorned this building for over a hundred years. Why they are there on a name is unknown.

Her Little Boy Was Very Ill With Summer Complaint.

Mrs. Ray Fleher, Lebert, Sask., writes:—For over a month last summer, my little boy was suffering from summer complaint. He got so bad there began to be traces of blood in his stool, and anything he ate would not stay on his stomach very long. He became so weak he could not stand up. A neighbor recommended

"Discouraged and in despair I sent for a bottle, not expecting any more benefit than from the many other medicines I had used, but to my surprise I noticed a change after he had taken a few doses, and before the bottle was used he was the same happy, healthy boy he was before he took sick."

W. N. U. 1805

Wheat Grading High

Quality Year In Wheat Production
In Saskatchewan

This year is a quality year in wheat production in Saskatchewan. Seventeen cars of No. 1 hard wheat have already been received by the flour mills in Saskatoon. To a date of the year, 1927 and 1928, there was just one car of No. 1 hard wheat produced in western Canada.

The wheat graded by the Dominion grain inspector at Saskatoon up to the present time shows a very high proportion of the high grades, as follows:

No. 1 hard, 6 per cent; No. 1 northern, 51 per cent; No. 2, 39 per cent; No. 3, 4 per cent.

A part of the No. 2 is Garnet wheat to which the No. 1 grade is not given.

At the Moose Jaw inspection point 50 per cent of the wheat is No. 1, 35 per cent No. 2, and the balance mostly No. 3. A. McPherson, of the Dominion seed branch, reports:

This year northern Saskatchewan is producing wheat of equal quality to that grown in the southern part of the province. This is held to be unusual as excess moisture during the growing season in most years makes the northern wheat starchy. The Elrose line is producing a high percentage of No. 1 hard, Hughton and Elrose being outstanding shipping points.

Interested In Peace Garden

Financial Support Promised By
Industrial Concerns In U.S.

Interest is developing in a proposal of horticulturists of Canada and the United States that an International Peace Garden be established at some point along the boundary between the two countries. The idea has brought expressions of approval from the Governor-General of Canada and Hon. William Phillips, the United States ambassador to the Dominion, as well as from several Canadian politicians of cabinet rank. The heads of many large industrial concerns on both sides of the boundary have promised financial support, and a considerable sum is in view as a nucleus of endowment for the garden.

Certain it is that a garden of the sort proposed would be a beautiful and fragrant memorial to the well known history of peace between Canada and her neighbor, and also an impressive pledge of goodwill. Its spiritual value at all times would depend upon the degree to which it was a symbol of cordial feelings actually entertained by the peoples of the two countries towards one another and as carried into practice by them.—Regina Daily Post.

Roumanian Scientist

Designs "Space Rocket"

Hopes To Carry Mail To America In
Thirty Minutes

A "space rocket," designed to shoot upward for 32 miles, and, it is hoped, be the forerunner of a rocket that will carry mail to America in 30 minutes, is to be built at once, it has been learned.

Prof. Hermann Oberth, a Roumanian scientist, designed the rocket. It will be built under the supervision of the U.S.A. Firm Company. Its object, for the first flight, is to measure the physical and chemical properties of the atmosphere. Instruments will be enclosed in it to this end.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Winnipeg Heads List

Aviation Club Has Record Of Over
Twenty Hours In Air

The rapid growth of air-mindedness in Canada is indicated by the fact that members of clubs in Canada have flown more than 10,000 hours during the first eight and a half months of the year.

The Winnipeg club heads the list with well over 1,000 hours in the air; Toronto comes second with about 1,000 hours, and Ottawa third with just over 900 hours.

One hundred and ninety-two new private and 57 commercial pilots have graduated from the ranks of the students in the clubs. In 1928 the figures at the end of the year showed 111 private pilots and 28 commercial.

This year there are 22 clubs in actual operation as against 15 last year.

Old Dobbin had one good point. Nobody brought out a new model about the time you got him paid for.

Artificial Silk From Acetic Acid

Combined With Cellulose Will Make
Fine Fabric Is Predicted

Prediction that the sour taste in vinegar will be used to make artificial silk was made to the United States Chemical Society today by Professor D. B. Keyes, of the University of Illinois. The sour substance with which chemistry's magnetic touch may make finer dresses was called by Prof. Keyes by its scientific name, acetic acid. He told of a newly-developed process at Illinois that he developed in co-operation with E. P. King and Sherlock Swanne, of the university. For making artificial silk it is combined with cellulose to form cellulose acetate.

Externally Or Internally, It Is Good.—When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Makes Ninety Miles An Hour

Mo'th 'Plane Purchased By Prince Is
'Pure British'

The Prince of Wales made his first flight as owner of an airplane, to see his father at Sandringham. It is a G. H. Gypsy Moth, price only \$3,300. The Prince would not buy anything not "pure British." The little Moth makes 90 miles an hour, is painted bright red and blue and carries a silver plate marked "H.R.H. The Prince of Wales." The little machine with aluminum nose is upholstered in scarlet leather which can be inflated to avoid bumps.

World's Grain Show

National Committee Will Meet In
Toronto In November

Hon. W. R. Motherwell, Minister of Agriculture, is calling a second meeting of the national committee of the world's grain conference and exhibition. The meeting will be held in Toronto on November 21.

Considerable work has been accomplished in preparing for the world conference which will be held in Regina in 1932. The tentative prize lists will soon be ready and will be so arranged that every province will have good chances in some of the classes. As soon as the lists are completed copies of them will be sent to all foreign countries with invitations to compete.

Would Broadcast Trials

The broadcasting of trials in Berlin courtrooms was being contemplated, says a report from the German capital. It was declared there were no legal objections to such procedure, since all trials are public, and that if inaugurated it would be a novelty which soon would be copied throughout the world.

RUSSIAN GRAIN WILL NOT AFFECT CANADA'S TRADE

Ottawa.—Canada's wheat trade would not be imperilled by a resumption of trade relations with Russia by the Labor Government in Great Britain for some years at least, Eight Hon. L. C. M. S. Amery, secretary of state for the dominions in Baldwin cabinet, said on his arrival here.

"In the present disorganized condition of Russia under the Bolshevik regime, it is highly improbable," Mr. Amery said, "that there will be surplus wheat to export for some years to come. The Russian farmer is probably only raising enough for his own needs." Accordingly Russian wheat would not constitute a competitive factor in the British market. Just how imminent was the possibility of a resumption of trade relations between Great Britain and Russia, Mr. Amery could not say.

Grant Priority To Dominion Taxes

Provincial Claim In Bankruptcy Is Second Says Supreme Court

Ottawa, Ont.—The Supreme Court of Canada, in a judgment handed down, held that claims for Dominion taxes had priority over claims for provincial taxes. The appeal was taken on behalf of the attorney-general of Canada and was opposed on behalf of the attorney-general of Quebec.

The action arose out of a bankruptcy matter. Both the Dominion Government and the Quebec authorities had a claim against the bankrupt for taxes. There was not sufficient to pay both claims in full. It then became a question as to which claim took priority.

The trustee in bankruptcy, in his dividend sheet, gave priority to the claim of the Dominion and said he was sustained by the trial judge, Mr. Justice Panneton. The court of King's Bench held, Mr. Justice Guerin dissenting, that both claims should rank concurrently. From that decision the Dominion appealed to the Supreme Court of Canada.

New Zealand Showing More British Pictures

Quota Has Been Set By Regulations Of Government

Wellington, New Zealand.—A greater proportion of British moving pictures will be shown in New Zealand in the future, according to new government regulations. From October 1, exhibitors will be required to screen a fixed quota of British films. The government says it has been assured simple support from both the talking and silent films from British studios will be available during the coming year.

Grain Stored At Vancouver

Statement Shows Over-Seven Million Bushels In Elevators

Vancouver.—Grain in storage in Vancouver elevators has reached a total of 7,285,000 bushels, a figure more than five times greater than the corresponding one for 1928, according to a statement issued by the merchants' exchange.

Ships bookings for wheat, already will be removed during the month of now, said that 1,026,933 bushels October, however.

Famous Film Missing

London, Eng.—It has been announced that the famous war film, "The Battle of the Somme," is missing. The film is the property of Dr. Quistin Mackintosh, who, as an army staff photographer, was in charge of it. It was while he was ill that the picture was removed for safety and now it cannot be discovered. The film was one of the most historic in the world.

Favors Canadian Flag

Nanaimo, B.C.—After debating for more than an hour, whether or not Canada had a distinct national flag of its own, the British Columbia School Trustees' Association decided that she had not, and that the proper authorities should be informed that the association favored a distinctive emblem.

There are only about 40,000 Eskimos in the entire Arctic.

The United States now has more than 10,000 miles of lighted airways.

W. N. U. 1905

Will Start In December

Preparations Almost Completed For Western Air Mail Service

Ottawa, Ont.—The western air mail service will be inaugurated early in December and the tentative date for the first flight has been set for the second week of the month.

This announcement follows the statement of the Department of National Defence that the radio and light beacons and the emergency landing fields will be installed and ready for use by December 1. The Post Office department is fully prepared to put on the service at that date, and the Western Canada Airways, it is understood, have completed preparation and should begin the flying end of the service on short notice.

The bi-weekly air mail service from Edmonton north along the Mackenzie River will begin earlier than the main service across the prairie provinces. This northerly service will commence as soon as the winter season sets in and the planes can use skis with safety.

New Airway Mapped

London To Capetown Will Be Longest In World

London, England.—The longest airway in the world—an 8,000-mile route from London to the Cape—is to be inaugurated by the Imperial Airways early next year.

As a result of the great 20,000-mile aerial survey of Africa, made by Sir Alno and Lady Coghlin in their big Short Rolls-Royce flying boat, a route through the heart of tropical Africa, passing over deserts and jungles, has been mapped out.

Agreements have been made with the various governments concerned for supporting the air line, and preparations are now being completed for its opening. Passengers and mails will leave London every Saturday in a giant triple-screw Armstrong-Siddeley air liner, and will arrive in Capetown nine days later, having flown by a combination of big air liners and all-metal flying boats.

Reparations Bank Shunned By League

Committee Withdraws Resolution To Establish Intimate Connection

The League of Nations will not support the present proposal to establish close relationship between itself and the international reparations bank provided by the Young plan.

This became clear when a resolution envisaging the establishment of an intimate connection between the two was withdrawn from consideration in the Assembly's committee that deals with economic questions. But its authors, Norway and Denmark, in withdrawing are believed to have gained part of their purpose.

Their move was interpreted in some quarters as a signal by the countries not concerned directly with reparations payments that they will not be greatly pleased if the proposed bank seeks to assume too dominant a function in the economic life of Europe.

Discuss Coal Prices

English Mine Owners Consider Question For Canadian Trade

London, Eng.—A dozen large coal mine operators from various parts of the country met Rt. Hon. J. H. Thomas, at the treasury, to discuss the question of prices of coal for the Canadian trade. The minister for employment who has just returned from Canada pointed out the great possibilities of the Dominion for British exporters. It was stated the deputations were not officially representing the mining association of Great Britain, but it was noticed that Evan Williams, chairman of the association and W. Lee, its secretary, were among those present. No statement was issued immediately.

Denies Dirigibles Are Obsolete

London, England.—Emphatic denials of the statements in London newspapers that the dirigibles now under construction for the British Government—the R-100 and the R-101—were obsolete, was made by Commander Sir Charles Burney, head of the Airship Guarantee Company which is building the R-100.

Birds Lured To Death

Toronto.—Lured by the brilliance of the beacon at Long Point, on Lake Erie, near Port Mowat, more than 800 song birds migrating to warmer climes for the winter, met death recently. Flying through a fog the birds were attracted by the bright light and dashed to death against the walls of the lighthouse.

Issue Interesting Report

Grain Commissioners Publish Baking Tests Of 1929 Flour

Winnipeg.—Low weight per bushel, lower flour yield, higher protein content, lower water absorption of the flour and excellent baking quality are features of a preliminary report on the milling and baking characteristics of western Canada's 1929 wheat crop, issued by Dr. F. J. Birchard, chief chemist to the Board of Grain Commissioners for Canada, and his assistant, T. R. Aiken.

Milling and baking tests conducted at the Dominion Grain Research Laboratory, in Winnipeg, indicate that, on the whole, the milling yield is inferior, but the baking quality, grade for grade, is fully equal to if not superior to that of last year, states Dr. Birchard, in the report. The effect of frost and immaturity is not a serious consideration as was the case last year, practically all the wheat is sound and mature, but each grade contains an increasing number of undeveloped kernels and consequently the weight per measured bushel would appear to be the chief factor in determining the grade.

LABOR PARTY IN ONTARIO HAS ENTERED LISTS

Toronto.—The Ontario Labor party officially entered the lists for the coming election when it issued as the first step of its campaign, a manifesto giving the following by way of a minimum program:

Unemployment insurance. Extension of the public ownership principle.

A law to permit the election of police commissioners.

A liquor referendum.

Compulsory public liability automobiles insurance.

Amendments to the Old Age Pension and Mothers' Allowance Acts.

The manifesto criticizes Premier G. Howard Ferguson, leader of the Conservative party, for bringing on an election "long before it was necessary to appeal to the country. Posing as an advocate of responsible government he has not thought fit to use the British method where the Premier announces on the floor of Parliament before the elected representatives of the nation that on a certain date an election will be held."

The Labor party has always stood for the discussion of the liquor problem free from party politics, says the manifesto. "It recognizes that the solution of the problem is the taking of the manufacture of liquor away from private capitalists. If there is to be government control, it must not only be control of the retail sale of liquor but also of its manufacture. It is therefore of the opinion that in a question like the liquor issue, where centuries of prejudice exist on both sides, that the question should be submitted to the people in the form of a referendum."

Edison's Pupil Visits Canada

Walter Huston, Seattle boy who won the special prize donated by Robert Edison, for research and inventive potentialities, was a visitor to Canada recently, when he took Canadian Pacific coast steamship "Princess Marguerite" in a round trip from his home city to Victoria and Vancouver, Huston who is likely to become a second Edison, will devote his life to scientific research, he says, following the example of his famous friend and mentor.

CHAIRMAN OF ROYAL COMMISSION

Philip D. Ross, proprietor of the Ottawa Citizen, has been appointed chairman of the royal commission, announced by Premier Ferguson, which will study the welfare needs of the province.

Will Remain In Canada

No Truth In Rumor That Sir Henry Thornton Was Leaving

Ottawa.—Sir Henry Thornton will remain in Canada as president of the Canadian National Railways. Any doubt on this point was settled by Premier Mackenzie King, following a recent meeting of the cabinet. In the absence of Hon. C. A. Dunning, minister of railways, who is in the West, the Prime Minister was unable to say whether or not a renewal of Sir Henry Thornton's contract with the government had been signed.

There was no question, however, about Sir Henry remaining in Canada, the prime minister said.

Recently there have been rumors that the president of the Canadian National might go to England.

Ban Religious Holidays

Soviets Dispense With All Religious Holidays, Including Sundays

Moscow.—All religious holidays, including Sundays, are abolished under the new 24 hour system of labor introduced throughout the Soviet Union. Workers are given one day of rest every five days.

The old holidays not abolished are October 25, anniversary of the October revolution; January 9, anniversary of Lenin's death, and May 1st and 2nd, international days of labor celebrations.

Tariff Board Application

Ottawa.—Initiation of investigations based on ten or more new applications will feature the first full sittings of the tariff advisory board which will open on Tuesday, October 29. China-ware, glassware, linoleums and wall papers are among the commodities that will come under review at the hearings, which will extend over two weeks.

Colony For Doukhobors

Two Hundred and Fifty Members Of Sect Transferred From Jail To Colony In B.C.

Nelson, B.C.—Some 250 Doukhobor men, women and children, who have been confined to the provincial jail here, were transported by the provincial police to Porto Rico.

Porto Rico is a former Christian community land camp which is situated some 15 miles south of Nelson. Last Friday when these Sons of Freedom were camping on the outskirts of the city, Peter Verigin offered this old camp site to the Doukhobors as a permanent habitat. Starting early in the morning trucks and buses carried loads of prisoners from the jail to Porto Rico until 4 p.m., when all the Doukhobors had been safely landed. Each bus in addition to the prisoners, carried a couple of deputies to preserve order if necessary. This measure was not necessary.

When all had arrived at the camp it was noticeable that many of the Doukhobors directly started to pick out their quarters from among the camp buildings.

The majority of the buildings at the camp are windowless and doorless, and the more industrious of the Doukhobors began to repair their future homes to protect them against the cold nights that are setting in.

Balloon Found Unmanned

Believed To Be One Piloted By French Flyer

Paris.—A tragedy of the air was indicated as a balloon without passengers floated to the ground near Kamenice, Jugoslavia.

The Aero Club of France was advised the balloon carried the club's flag, and that blood spots were found on the torn basket. An altimeter registering 5,000 meters (about 19,000 feet) was found by peasants nearby.

It was believed the balloon was the one in which Pilot Nuger left St. Cloud, near Paris, to compete in the Amont-Trieville Cup race. The place where the bag was found is 850 miles from Paris.

Convicted Of Manslaughter

Mrs. Pantages, Wife Of Theatrical Magnate, Found Guilty By Jury

Los Angeles.—Mrs. Lois Pantages, wife of the theatrical magnate, was convicted of manslaughter by a jury which heard her trial on a charge of second degree murder.

The jury of five women and seven men made no recommendation for leniency. The sentence for manslaughter is fixed by California law at from one to 10 years in the penitentiary. Three women jurors wept as the verdict was read.

Mrs. Pantages was charged following the death of a Japanese gardener, killed when their automobiles collided last June.

GRAIN EMBARGO IS REQUIRED TO EASE CONGESTION

Winnipeg.—Serious congestion in the lake head's mammoth grain elevators brought suggestions that the placing of an embargo on western grain shipments appeared to be the only remedy to the situation.

Port William and Port Arthur terminal elevators, with a storage capacity of 86,000,000 bushels today are housing practically 70,000,000 bushels, leaving a comparatively small storage space through which to move the incoming crop.

Lack of demand for Canadian grain in the world markets, and the resulting congestion at Montreal, is responsible for the situation at the head of the lakes, and railway authorities here intimated that the placing of an embargo probably will be necessary.

E. B. Ramsay, chairman of the board of grain commissioners, commenting on the situation, said an embargo seemed to be the only remedy.

A similar situation arises every fall, pointed out the grain board chairman. He indicated however, that last year at this time the shortage of cars to handle the heavy prairie crop had itself acted in the nature of an embargo, preventing progress of grain to the lake head. This season, with sufficient cars available to move the wheat east of Port Arthur and Port William elevators are reported plugged almost to capacity, while last year's conditions led to an early rush east of lake boats.

NON-PREFERRED ENTRY RECEIVES FURTHER CUT

Ottawa.—The number of farm laborers which transportation companies will be permitted to bring into Canada from non-preferred countries of Europe will for next year be further reduced by 25 per cent. The present provisions to encourage emigration from the British Isles will be continued including the two pound assisted passages.

Representatives of the Canadian Pacific Railway and steamships, the Canadian National, the Hudson's Bay Company, and several ocean shipping companies recently spent a day in conference with Hon. Robert F. O'Connell, minister of the Immigration Department, laying plans for next year's movement. Although the transportation companies had hoped for greater scope for bringing out farm laborers, the decision of the minister seemed to have been fairly acceptable.

A year ago in order to reduce the influx of immigrants from Central Europe the number of farm laborers which were allowed from non-preferred countries was limited to one-third the previous year's total. This resulted in 10,000 less entering Canada. While the restriction was even greater than this year, the requirement that the movement be completed by May 31 is not so far being continued. And there is also more latitude in the case of those who have fellow countrymen here willing to assist them in getting located on the land.

At the conclusion of the conference the following statement was issued by the department:

"It was agreed that British immigration will continue to receive every possible encouragement. A renewal of the assisted passage agreement for certain classes of British migrants, which expires at the end of the present calendar year, was recommended. These classes include families for land settlement, houseworkers, and juvenile immigrants moved under provincial government or recognized societies auspices.

No Canadian Race

But Bureau Of Statistics Accepts "Nationality-Canadian"

Ottawa.—There is a Canadian nationality but no Canadian race, any government form filled with nationality as "Canadian" is accepted, was the opinion of the Dominion Bureau of Statistics.

Complaint was made in Toronto of a father who three times entered his child as Canadian and the form was returned, Ottawa being blamed. It pointed out that the vital statistics forms are made to the provincial authorities and not to Ottawa.

If the form was returned because the new baby was termed Canadian, it must have been returned by the provincial authorities. The Bureau of Statistics accepts "Nationality-Canadian," but also seeks racial origin, which has nothing to do with nationality.

Exhibiting Canadian Pictures

Ottawa.—Four pictures from the National Gallery will be sent to London shortly as the Dominion's contribution to the exhibition of Italian art, which will be held at the Royal Academy early next year. The exhibition is to be one of the most comprehensive ever held, embracing Italian art from the 12th century to the present day.

Prince Appoints Air Pilot

London.—E. H. Fielden, of the air force officers' reserve corps, has been chosen personal air pilot to His Royal Highness, the Prince of Wales, in his new post. Fielden will fly the plane owned by the Prince. This is the first time a member of the royal family has had an air pilot attached to his entourage.

Manitoba Has Large Surplus

Winnipeg.—A surplus of \$2,005,062 for the fiscal year ended April 30, 1929, was announced by the provincial government through Hon. W. J. Major, attorney-general, in the absence of Premier Bracken, who holds the portfolio of provincial treasurer.

Adjourns Tenth Session

Geneva.—The assembly of the League of Nations on September 25 adjourned its tenth annual session, which delegates from more than fifty nations held in the most constructive and progressive during the ten years of existence of the league.

THURSDAY, OCT. 3 1929

NOTES AND COMMENTS

A delegate at the miners meeting at Blairmore stated that from October of 1928 to October of 1929, the mine there would have worked 189 days. This is the common experience of towns in the steam coal area. That there is need for grappling with the problem to find if employment can be spread among resident miners is very evident. Many are forced to ask for credit or go without. The miner does not want relief from public funds. He abhors the thought. There are many who have lived here for years. They have built houses, have raised families and fulfilled their duties as good citizens. And the present problem is one which they have got to try and solve through their executives. It is of equal importance to the retailers of the district. They cannot remain in business if the community is impoverished. It is as much their problem as it is that of the miners. The railway company which is the largest purchaser could undoubtedly help to alleviate the present difficulty, as the industry is almost entirely dependent on their actions.

"Laws are not made for oppression of the people, but for guidance," a learned judge once told a policeman who had been somewhat over-zealous in bringing a man to court. Last week a lad was fined \$9.00 for driving a truck without having his driver's license with him. He had changed his cap and omitted to bring the license. There was no attempt to evade the law, yet because the statutes state that a driver must carry his license, the police established their case before a local magistrate. Discretion must be used if people are to respect the law, otherwise law officials will not be able to secure the co-operation of the people which is essential to the observance of laws.

The best way to find out how churches are supported is to be a member of a finance committee. It would prove an eye-opener. Many who profess to be members of churches do not even give the widow's mite.

A man remarked that unless there was something other than work for one living in the mountains, he would go crazy. Recreation is necessary, and each takes it to his own liking. But it is hard to get the point of view whereby one could go crazy in the mountains. The beauties of the Rockies, especially at this season, excite admiration in the minds of the great majority. The ideal weather of Sunday, for instance, and the mirrored reflection of the mountains in the nearby lakes, was in itself a tonic to jaded nerves. What would the prairie-dwellers give for a view such as that?

Fifteen thousand dollars invested at 6 per cent. will bring \$2.47 a day. The first problem, however, is to get the \$15,000 and the next is to get 6 per cent. with complete safety.—Christian Science Monitor.

Yet some people expect to get rich quick on a hundred dollars worth of oil shares.

Coleman received a visit last week from its Federal representative, G. G. Coote. He came on invitation of the miners' union executive to confer on later conditions in the Crows Nest Pass. He also interviewed executives of the mining companies, in order to obtain the views of all parties concerned. It is interesting to note that in the last election he received the short end of the votes in this district, but nevertheless he is alive to the responsibilities of all his constituents, no matter what their political faith may be. He very frankly admitted he knew very little of the conditions of the coal mining industry, and that he came to learn. Mr. Coote in private life is a farmer, consequently he knows something of the struggles of those who have to work for a living. And that he is desirous of rendering service is evidenced by his actions in coming here and getting a "close-up" on local problems from the miners and the operators viewpoints. The Pass would welcome hearing and seeing a little more of Mr. Coote, and appreciates his interest in acting as one of a delegation to interview Premier Brownlee in an effort to alleviate the unemployment conditions that the Pass is experiencing. The problem is difficult, he admits; but if a sound mental attitude is maintained some improvement can be effected.

Why do dances commence at any time between 9 and 10.30 p.m., and continue till 1 or 2.30 a.m.? Just habit! Suppose a dance commenced at 8 and finished at 12 p.m., people would have just as much time in which to dance. Besides they would feel fresher next morning. But why even suggest the thing? A dance apparently would not have as much "kick" if it was completed as the clock struck twelve. It would be too much like Cinderella. We are slaves to habit in our pleasures as in many other things.

Getting a STRANGLE HOLD on that MORTGAGE

THERE were long, lean years for you—and Mother—before success began to come.

Her hair is grey now—and you are no longer young.

But you dream of leaving a mortgage-free homestead for Bobby, without the hardships you went through.

Yet you realize the Risk—the sleepless mortgage that still grips your broad acres.

It's THAT that wakes you in the night—the haunting fear that even after your long fight (should death come) your family might not be able to lift that mortgage—might lose the farm and make all the accumulated labor,

deprivations, economies and money investments of many years, a vain effort.

When you placed that mortgage on the farm did you assure your life for at least a corresponding amount, payable when the loan had to be repaid, or at death?

If you didn't you only added to the anxieties of your widow and family.

Afraid you couldn't pay the premium on the policy? Could your widow pay the interest and maintain the sinking fund on the mortgage?

Don't continue that Risk—cover the mortgage with a life assurance policy that will discharge it—and leave a balance, payable monthly, for current expenses.

See the Sun Life representative. It will entail no obligation on you.

SUN LIFE ASSURANCE COMPANY OF CANADA

HEAD OFFICE MONTREAL

Furnacettes and Heaters

To Suit Large or Small Houses at Prices
From \$30.00 to \$105.00

The McClary Furnacettes are real furnaces—not heaters enclosed in a sheeting of tin. Inspection is invited to convince you of their qualities, and you'll be pleased you bought one.

Fine Black Furnacette Junior.....	\$ 45 00
Superior Enamel Furnacette Junior.....	65.00
Large Size Furnacette.....	105.00

For heat satisfaction and fuel economy, these furnacettes with the latest design represent the very best in values. We recommend them to the limit.

No matter what size of a house you desire a heater for, we can supply you and at most reasonable cost.

Newspapers Read by Everyone

No matter what enterprise you may be engaged in, if it is desired to secure the interest and support of the public, it is necessary to use publicity or advertising to inform people intelligently and quickly. It is to the newspapers that people look for information on every phase of activity. Kings and emperors, prime ministers and the humblest voters, business executives and workers, all look to the newspapers for information.

Aggressive business men desiring to develop local business use the local newspaper, because it goes into the homes and is read more thoroughly than any other newspaper.

Ledie Griffiths left on Sept. 22, for Macleod, where he has taken up duties on the C. P. R. as brakeman.

How The World Moves!

The following, taken from the Christian Science Monitor, has very much humorous interest.

Back in the year 1881 a New York newspaper printed this item:

"A man about forty six years of age, giving the name of Joshua Coppersmith, has been arrested for attempting to extort funds from ignorant and superstitious people, by exhibiting a device which, he says, will convey the human voice any distance over metallic wires so that it will be heard by listeners at the other end. He calls the instrument a 'telephone,' which is obviously intended to initiate telegraph, and win the confidence of those who know the success of the latter instrument without understanding the principles on which it is based. Well informed people know that it is impossible to transmit the human voice over wires, or may be done with dots and dashes and signals of the Morse Code, and that, were it even possible to do so, the thing would be of no practical value."

In years to come will historians wear the same knowing smiles when they read in the political speeches and editorial broadsides of today that war will never be entirely abolished?

Appreciated Assistance

D. Gillespie, secretary of the local of the Mine Workers' Union of Canada, has received letters from relatives of the late Julius Cunningham, expressing their appreciation for the kindly help given him during his illness, and for their services in connection with the funeral. They also thanked the various organizations who assisted, including the Orange Lodge, the Canadian Legion, the town band and town council.

Striving to be a success at your work, instead of trying to be a house, may enable you to be a success at both.

Here and There

(294)

In commemoration of the ill-fated d'Anville expedition which camped on the shore of Bala d'Anville in 1745 and in which d'Anville and many of his men died of illness, His Honor Lieutenant-Governor Tully of Nova Scotia unveiled a monument erected by the Historic Sites and Monuments Board of Canada at Hockingham, N.S., recently. Many distinguished guests attended the ceremony.

Total quantity of strawberries exported from Nova Scotia to the United States during the present season was 7,844 crates with 22 boxes to the crate. The blueberry crop of the province has attained record proportions, 20,814 crates having been shipped to Boston so far this year, with another month to go, as compared with 17,442 crates for the whole season of 1924.

Major prize winners at the Highland Gathering and Scottish Festival recently held at Banff are announced as follows:—Pipe-Sergeant Donald McLeod, of the Queen's Own Cameron Highlanders of Winnipeg, is the winner of the special inter-regimental competition for delegate pipers from Canadian Highland units and holder of the E. W. Beatty Trophy; Pipe-Sergeant J. K. Cairns, of Hamilton, is the winner of the special trophy competition, open to all regimental pipers who are regular members of a pipe band officially connected with any regiment or unit of the Canadian militia; and Piper Hector McDonald, Royal Highlanders, Montreal, took the highest aggregate number of points over all in the open piping event.

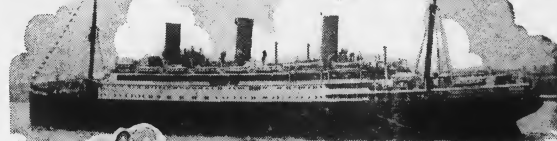

According to figures obtained by the Canadian Pacific Steamships Limited, the port of Vancouver now ranks first of Pacific Coast ports, outstripping San Francisco and Los Angeles in volume of outward and inward shipping traffic and tonnage of exports and imports.

"I am paying my first official visit to Canada as Chief of the Salvation Army and while here I hope to meet at the three annual gatherings to be held in the Dominion every officer of the Salvation Army in Canada and Newfoundland," said General E. J. Higgins, newly elected head of the Salvation Army, who arrived at Quebec recently on board S.S. Empress of Australia.

More than 365 miles of new rail lines in western Canada will have been completed and turned over to the operating department of the Canadian Pacific Railway in the period between June 15 and September 15 of this year, is the statement made recently by D. C. Coleman, vice-president of western lines of the system. This mileage does not include Mr. Coleman added, a further 270 miles of lines under construction as at September 1.

"The World's Mine Oyster," Said Falstaff.

EMPEROR OF AUSTRALIA SAVING NEW YORK

CHINESE DANCING GIRL

OLD NEPTUNE COMES ABOARD

Gruise. Besides making her regular visits to the highlights of the Mediterranean, to India, Japan, China, Hawaii and other fascinating places, her itinerary this time has been extended to include Athens in Greece, Pagan and Bangkok in Siam, with further calls at Keelung for Taikoku, in Formosa. She will be gone 127 days, visiting 81 ports and places in 24 countries.

Athens is really three towns in one—the twisted lanes of the Athens that was little more than a Turkish village before the Greek War of Independence, the broad straight streets of the modern capital and the interesting ruins clustering round the Acropolis representing "the Glory that was Greece." The Parthenon, one of the most interesting ruins here, was chief among the buildings with which Pericles adorned the Acropolis about 460 B.C.

Bangkok, the capital of Siam, was originally built on floating pontoons or piles on the river's edge, but nowadays well-planned roads and streets radiate from the city in all directions, beautiful Buddhist temples are scattered all over the town, and the Royal Palace is one of the show places of Bangkok.

Keelung, the chief port of the island of Formosa, is a hive of industry. Formosa is half the size of Ireland and is governed by the Japanese. In its northern fastnesses, still largely unexplored, lived the headhunters. The Japanese campaign of subjugation, however, has all but wiped out these barbarous people. The seat of government at Formosa is Taihoku. Here fleets of junks, manned by coolies, transport the visitors around the town, one of the chief attractions of which is the Governor-General's garden, where the world's most beautiful tropical plants bloom in exotic profusion.

WORLD HAPPENINGS BRIEFLY TOLD

Great Britain in 1923 had the lowest infant death-rate ever recorded. Out of every 1,000 children who lived to be one year old, only 65 died.

The population of Saskatoon is nearing the 50,000 mark, according to 1923 issue of Henderson's Directory. It is now estimated by the publishers that this city has 47,653 residents.

The Aero Arctic Association has announced that financial backing has been obtained for the Arctic expedition of the Graf Zeppelin next spring. Dr. Hugo Eckener, commander of the dirigible, will have 45 persons with him on the flight.

The promotion of Charles Clifton Perry from the post of Indian agent at Vancouver to that of assistant Indian commissioner for British Columbia, at Victoria, has been announced by the civil service commission.

Some of the first issue of Danish cancer stamps have been seen in London. These stamps issued by Denmark to benefit the Danish cancer fund, are in three colors, red, green and blue, in three denominations. All bear the Mercury wand design.

It's just as easy to get wrong numbers at sea now as it is at home. Telephone booths and other conveniences have been built on the steamship Berengaria for regular land communication while the ship is going between England and other countries.

A reward of \$1,000 has been offered by the provincial government for information leading to the arrest and conviction of person or persons in the Doukhobor district responsible for the burning of schools throughout the area. This announcement was made by M. A. MacPherson, attorney-general.

The Newspaper Guide

Advertisements Are To Shoppers
What Time-Table Is To Traveller

The newspaper that carries a good line of advertisements is to the shopper what the time-table is to the traveller and the published guide to the tourist. Busy people start to study these advertisements in the home or in the office, and before they start shopping they know where they are going. — In fact, business places are points of interest to all tourists, and the non-advertiser puts himself outside the pale so far as strangers are concerned.

Edmonton Building Permits
Building permits in Edmonton topped the \$4,000,000 mark this year, up to the end of August, being \$4,188,290 or more than a million above the similar eight-month period of last year.

Extending Radio In Arctic
Russia is rapidly radiofying its Arctic possessions. The radio and meteorological station at Franz Joseph Land already is functioning, and another is being constructed on Wrangel Island.

A Bible from the Russian Imperial Palace
of Tsarskoye Selo, its cover encrusted with diamonds and emeralds, was recently offered for sale in England.

Germany Planning World 'Plane Lines'

Company Aims For Regular Flying Boat Service Over Atlantic In Two Years

A gigantic network of air lines which will cover the entire world is being planned by Luft Hansa, Germany's most important air company. The plans are being worked out by Otto Mierkel, who has given up his post as head of Luft Hansa to devote himself to founding an international company, which promises within two years to open regular air lines between Europe and the United States.

Working jointly with the Hamburg-American steamship line, preliminaries have been completed. The details of the new company are still somewhat uncertain, but the approximate direction of developments has been mapped out.

"Not only is the world's interest concentrated in air travel, but in all countries the best technical experts are working out the details," said Herr Mierkel. "The experimental stage is behind us and the goal is clear. We have fine 'planes'—especially in America, excellent motors, and everywhere responsible pilots and dependable instruments which will result in an even higher standard soon."

Device Registers Accidents

New Invention To Help Catch Hit-and-Run Driver

A device to catch "hit-and-run" drivers of automobiles has been made by a Berlin inventor named Rudolf Hofmann. The mechanism is described as "an automatic traffic protector."

It is adjusted under the chassis of an automobile and at the instant of any impact automatically raises a white plate with a winking red light above the car's license plate. It also registers the automobile's speed.

PARIS COTTON FROCK

It is quite possible to appear smart, dainty and comfortable this season, because Paris decrees the sheer printed cottons are the newest choice for summery wear. Style No. 562 is strikingly effective in printed cotton voile. It is in flattering capucine tones which enhances the charm of the sun-tan complexion. The applied yoke of bodice which boasts of modern influence, is in plain voile in blending tone which appears again in circular inset of skirt. The hip-line is given a swathed effect through drape of skirt. It is a fetching dress for town or resort. It comes in sizes 16, 18 and 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Printed lawn, sheer linen in paste or print, lowered chiffon, shantung, printed rajah silk, crepe de chine and georgette crepe appropriate. Patterns price 25 cents in stamps or cotton (coin is preferred). Wrap copy carefully.

World Famous Artists On Canadian Radio

HAROLD BAUER

FLORENCE AUSTRAL

Florence Austral, the world's greatest dramatic soprano and Harold Bauer, one of the outstanding pianists of all time, two of the world famous artists who will be heard on the air this season during the Imperial Hour of Fine Music, to be broadcast from Toronto every Sunday evening, beginning on October 6th, from 8 to 9 Central Standard Time. Miss Austral opens the series on Sunday evening, October 6th and Mr. Bauer will be heard on October 20th.

Announcement of a series of concerts by world famous artists on a Canadian radio chain was made yesterday by F. J. Wolfe, Director of Imperial Hour, Limited. The series will begin on October 6th and will continue for twenty-six weeks. It will be broadcast through stations at Montreal, Ottawa, Toronto, London, Waterloo, Winnipeg, Saskatoon, Regina and Red Deer and, with the completion of hook-up facilities at the end of the year, at Vancouver.

Among the universally known artists who have been engaged for this series are Florence Austral, the world's greatest dramatic soprano; Sophie Braaulu, the great contralto; Harold Bauer, one of the outstanding pianists; Richard Crooks, the American tenor who, though only twenty-eight years of age has scored notable triumphs in Europe and America; Lea Luboshutz, who is said to be the greatest of all women violinists; Hans Kindler, the famous Dutch cellist; The London String Quartet; Albert Spalding, great violinist; Luella Mallus, one of the most famous coloratura sopranos; Josef Lhevinne, the great Russian pianist; Richard Bonelli, leading baritone of the Chicago Opera; The Redford Palace, formerly of the Imperial Palace at Petrograd, and others.

The series will consist principally of symphony concerts at most of

which one or more of these famous artists will assist. A great symphony orchestra of more than fifty players has been engaged and will be under the direction of Reginald Stewart, who has lately returned from a concert tour in Europe, and who has been engaged as a guest conductor for the London Symphony Orchestra in April next. The concerts will originate in Toronto and will be from 10 to 11 o'clock Eastern Standard Time for twenty-six consecutive Sunday evenings, beginning October 6th.

"Our object in promoting these concerts," Mr. Wolfe said, "is to bring to people within reach of available hook-up facilities in Canada, music and artists which, without the medium of radio, could not be heard outside the great metropolitan centres. We do not regard radio broadcasting as a direct advertising medium and feel that it can function most usefully in purveying entertainment of educational and artistic merit. The aim of the orchestra and guest artists will be to broadcast classical music and modern novelties of more than ordinary merit."

The series, which will be known as The Imperial Hour of Fine Music, will go on the air through stations CHVC, Montreal; CNRO, Ottawa; CKMG and CFBP, Toronto; CIGC, London; CKRW, Waterloo; CFYC, Winnipeg; CHWC, Regina; CKQC, Saskatoon; and CKLC, Red Deer.

Recipes For This Week

(By Betty Barclay)

GRAPEFRUIT PRESERVE

Remove outer yellow rind and most of the white by peeling very thick. Halve the fruit, and with sharp knife cut out the core. Then slice across and place pulp in granite kettle with very little water and cook at moderate heat. When at boiling point, add three-fourths pint of sugar to each pint of fruit pulp and juice, then cook slowly 15 minutes. Seal in small jars.

GRAPE JAM

Stem grapes, wash and press pulp from skins. Place pulp in a kettle, cook until soft, then rub through sieve to remove seeds. Cook skins until soft in just enough water to cover. Combine the pulp mixtures and boil for five minutes. Measure and allow one cup of sugar to each pint of fruit. Cook until thick—which will be in a very few minutes. Then pack in clean hot jars and seal carefully.

Everybody Was Pleased

He was in London for the first time, and his uncle, a stockbroker, was showing him round Throgmorton Street.

"Why is that little fat man winking and whispering to all those others?" asked the visitor.

"Oh," returned his uncle, "he's bought in the stock of an oil company dirt cheap."

The visitor looked about him and noticed another man who was also whispering and chuckling to some friends.

"What is he so pleased about?" he asked his uncle.

"Oh," was the reply, "he's the man who sold the stocks."

Putting Her Right

A little girl carrying two kittens to Oldham, lost her way, so accosted a passing rustic, thus: "Excuse me, but is this the way to Oldham?"

"No, miss," came the ready response, "you want to take 'em by the scruff of the neck!"

SUNDAY SCHOOL LESSON

OCTOBER 6

RECOGNIZING OUR DEBTS TO OTHERS

Golden Text: "Not looking each of you to his own things, but each of you also to the things of others.—Philippians 2:4.

Lesson: Nehemiah 4:15-23; Mark 12:28-34; Romans 15:1-7; Philippians 2:1-8; Colossians 3:12; 4:1; James 2:14-17.

Devotional Reading: Psalm 40: 5-10.

Explanations and Comments

Recognizing Our Debt To Others, Mark 12:28-34.—A scribe who was standing by, and knew that Jesus had answered wisely the question put to Him, asked Jesus, "What Commandment is the first of all?" Jesus replied by quoting Deuteronomy 6:4-5: "Hear, O Israel: the Lord our God, the Lord is one; and thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind, and with all thy strength; for the Lord is one." In these terms some interpreters recognized the language of primitive psychology. An attempt at a thorough or fourfold division of human nature, "soul" referring to the "mind" to intellect, "strength" to will, but whatever may be thought of this suggestion, it is manifest that the words are intended to claim for God the affection of human nature in all its extent and in all its intensity.—James Stalker.

"The second is this," continued Jesus and quoted Lev. 19:18: "Thou shalt love thy neighbor as thyself." The chief service rendered by Jesus to this second commandment has been to associate so closely with the first. In the Old Testament the two Commandments lie far apart with no indication of any connection between them; but He brought the two together in such a manner as to suggest that they have an intimate relation to each other. In reality they are two commandments; and so closely are they connected that they cannot exist, or at all events they cannot have a healthy existence, apart.—James Stalker.

Fulfilling Our Debt To Others, James 2:14-17.—"What doth it profit, my brethren," James asks (the Greek means literally what is the use), "if a man say he hath faith, but have not works?" Can that faith save him? When for the answer he says, "What we think, or what we know, or what we believe is, in the end, of little consequence, the only thing of consequence is what we do." He is speaking of a mere doctrine, a barren belief that does not lead to action, and so James when he says, "What doth it profit if a man say he hath faith, but have not works?" Moreover, the "faith" referred to here, as the Expositor's Greek Testament explains, "Faith is expressed in the 'works' (Deut. 10:12); Hear, O Israel, the Lord our God, the Lord is One; this was the fundamental principle of Jewish faith, and that it is this to which reference is made, and not the Christian faith, is obvious from verse eleven, which contains the essence of the 'Shema.'"

Saving In Train Haul

Grain shipped from Saskatoon to Liverpool by way of Montreal has to travel 5,213 miles. By way of Churchill it has to travel 3,791 miles. The distance between the two ports and Liverpool is about the same—the saving is in train and lake haulage in Canada and changes and re-loading.

Sweden Leads the World

Sweden today leads the world in the number of radio receiving sets, in proportion to its population. The latest statistics show that there are 412,115 sets to about 6,000,000 inhabitants, or 67.5 for each thousand citizens.

Germany is holding many centenary celebrations this year.

Take Off Over-weight

Modern science says
sugar supplies energy that
lets you carry on with less
food and safely reduce
weight.

WRIGLEY'S is pure
chicle, sugar and flavor.
Chewing the chicle dis-
solves the sugar and re-
leases the flavor.

In this pleasant way you
get needed body fuel and
reduce the pounds.

Remarkable Self-Denial

Scottish Girl Saves Throat To Bring Family To Canada

After having been only two years in Canada, Miss Jean Turley, late of Coalburn, Lanarkshire, Scotland, has been able to bring her father, mother, and ten brothers and sisters to join her in the home which she has prepared for them in Montreal. By donating herself every luxury—she has never been into a picture show in Canada—and saving every cent of her wages as a servant, Miss Turley was able to save part of the large family's passage money, the remainder being provided by the British Dominion Emigration Society. Miss Turley's father found work difficult to obtain in Lanarkshire, but jobs in Montreal have been promised to all members of the family old enough to undertake them.

Miss Turley is now 23, and her brothers and sisters range from 21 to 3 years of age.

Speaking of the sacrifices which she had made for her family, Miss Turley said:—"It is all over now, and I am very glad to see them."

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible, and it fits. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It is cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but one width of 36 inches only. A square yard of WINDOLITE weighs about 14 oz. and a square yard of glass of ordinary thickness, weighs about 135 to 150 oz. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

ST. ALBAN'S CHURCH

Sun., Oct. 6, Evensong 7 p. m.
The harvest festival will be held on Sun., Oct. 20.

The St. Alban's J.W.A. had the great honor of winning the first prize for their Dorcas display at the quarterly board meeting of the W. A. held in Calgary recently. The prize was given by Mrs. MacArthur, Diocesan secretary.

The J. W. A. will hold a bazaar on Sat., Nov. 23. Please keep this date in mind. Further particulars later.

The second of the W. A. whist drives was held on Monday evening, the following winning the prizes: Mrs. Lang and Mrs. Clifford, and Mrs. Thom and Mr. P. et. The next whist drive will be held on Mon. Oct. 14.

Died on Sunday

The death occurred on Sunday of Mrs. Bertha Bozzer, whose husband and parents reside in Coleman. Sympathy is felt by the townspeople for the family in the death of this young woman. The funeral was held this afternoon, the service being held at Holy Ghost church, and interment in the Catholic cemetery.

Personal and Local

Attend the Tennis Club dance on Tuesday evening in the K. P. hall.

Prize winners at the K. P. whist drive on Saturday were Mrs. Peet, Mrs. Wm. Cousins, Mr. John Denholm, Mrs. G. R. Powell.

Miss Eleanor Neilson, a former pupil of Coleman high school, left on Sunday to commence training in the General hospital, Calgary.

Mrs. Geo. Neil returned home on Sunday after spending four months in Quebec province and at Hartford, Conn.

'Bill' McGrath left on Tuesday to open a barber shop at Turner Valley, in the heart of the oil development area.

Mrs. F. Graham, sr., returned from Edmonton yesterday, and will leave again on Friday for Nelson, as her father, Mr. Maltby, is seriously ill.

The big picture for the week-end at the Palace theatre is "The Fleet's In," with the favorite Clara Bow in the lead. It has made an extraordinary hit wherever shown.

The Rev and Mrs. Wilcox, of Dartmouth, N.S., arrived last week to visit Supt. and Mrs. McLeod. At present they are on an auto tour to the coast, with Mr. and Mrs. McLeod.

Mr. and Mrs. R. Evans returned on Saturday from two weeks' holidays, having motored to Calgary, Banff, via the Windermere highway to Spokane, and state they enjoyed every minute of the trip.

Mr. and Mrs. Robbie of Nanton were visitors with Mrs. Nielsen during the week, returning on Sunday. They recently lost by death their 15-month-old daughter, and Mrs. Nielsen attended the funeral at Nanton.

Mrs. L. V. Hewitt, who has been visiting with Mr. and Mrs. J. H. Boulton since May, left on Tuesday for her home at Smiths Falls, Ont. She was accompanied to Calgary by Mr. Boulton, who spent a couple of days in the city on business.

Mayor Burns and daughter Dorothy expect to move to a new cottage at Crows Nest Lake recently erected by the power company. Mr. Burns for many years has resided on Fourth street, and his employment as engineer at the plant makes it much more convenient for him to live there.

Sunday was Rally Day at St. Paul's United church, and the morning service was attended by a large number of parents and children. The Rev. H. J. Bevan delivering a special sermon. Next week the Georgian Singers will give a concert in the church, for which tickets are on sale.

Miss Peggy Fairfull, a popular Coleman girl, was the guest of honor at a farewell party given by the senior C.G.I.T. group on Thursday last, at the home of Mrs. H. J. Bevan. The evening was spent in playing games and singing songs; after which lunch was served. Towards the close of the evening a presentation was made by Grace McKinnon on behalf of the girls. Miss Fairfull left on Sunday for Calgary, where she will take a course at Garbutt's Business College.

Early Morning Alarm

A smouldering fire was discovered at 1:45 a. m. to day at the Empress hotel. The smoke awoke the proprietor and people staying in the house, who made preparations for a hasty exit. Prompt action and the fire hose in the hotel extinguished the blaze, so that it was not necessary to turn on the hydrants though the brigade responded very promptly and had two hose lines ready for action.

Fine Catch at North Fork

Eleven trout making a total weight of 21½ lbs. were caught at North Fork by William McCulloch on Sunday. The largest was 6½ lbs. and measured 26 inches in length. One was 2½ lbs., and the balance weighed from 1 lb. to 2 lbs. This is one of the best catches of the season recorded.

CLASSIFIED ADVERTISEMENTS
